# Enjoy the lasting beauty of Artefill® Injectable Filler

## Important Treatment Considerations

Artefill is indicated for the correction of facial wrinkles known as nasolabial folds or smile lines. Some people should not receive Artefill, including those who have a positive reaction to the Artefill collagen skin test; have a history of severe allergies manifested by a history of anaphylaxis, or history or presence of multiple severe allergies; are allergic to the anesthetic (lidocaine); have a history of allergies to any bovine collagen products; are undergoing or planning to undergo desensitization injections to meat products; are prone to thick scar formation and/or excessive scarring.

As with any injectable wrinkle filler, you can expect mild swelling and reddening at the treatment site. These side effects are usually gone within 24 hours. If you are taking aspirin or anti-inflammatory drugs you may experience increased bruising or bleeding at the injection sites. Patients with any skin outbreaks (eg. cysts, pimples, rashes, hives, infection) near the injection site should postpone treatment until they clear. The safety and effectiveness of Artefill beyond one year have not been established.

It is important that you share your medical information with your doctor. Together, you can make an informed decision as to whether Artefill is right for you.

For more information and to locate an Artefill-trained physician in your area, visit [artefill.com](http://artefill.com).

Natural, long-lasting wrinkle correction

# A long-lasting wrinkle filler that gives you natural results that you will love

## ARTEFILL PROVIDES NATURAL SUBTLE RESULTS

By working with your body's own collagen, Artefill provides immediate results with a natural, elegant feel. If you're not looking for a different you, but a more refreshed, younger looking you, then ask your doctor about the natural elegant results of Artefill.

**The results are what I had hoped for. I feel that Artefill really has changed my look, but not in a dramatic way. I feel as if it has enhanced me, it has made me feel younger and look younger and I've had positive results and a lot of compliments.**

—MARINA, ACTUAL ARTEFILL PATIENT

## ARTEFILL IS LONG LASTING

If you want an injectable wrinkle filler that provides immediate results that last a long time, then Artefill may be just what you are looking for.

If you have used temporary wrinkle fillers in the past, then you know that they are eventually absorbed by your body and require frequent repeat injections to maintain the results you've come to love.

Artefill is different from temporary injectable wrinkle fillers. The unique microspheres in Artefill are not absorbed by the body and provide the support your skin needs for natural, long lasting results.

**I am truly, truly happy with the results that I got from the Artefill treatments. It gave me exactly what I was looking for and the fact that you can't see it or feel it is really the best part about it.**

—MARISSA, ACTUAL ARTEFILL PATIENT

## ARTEFILL IS A SMART INVESTMENT IN YOU

Artefill is truly an investment in you! Since Artefill is the long lasting solution that requires fewer injections over time, you will see the real value in money and time saved with Artefill over temporary injectable wrinkle fillers.

Artefill treatment is a simple in-office procedure, with minimal downtime, you can return to your normal routine right away.

**I'm at the age where I'm starting to feel the effects of aging. The fact that I feel young and still look good and I'm catching those wrinkles early on makes me feel better about myself and translates into other areas of my life**

—LINDA, ACTUAL ARTEFILL PATIENT
